Education

Technical University of Munich (TUM)

Munich, DE

Master of Science with Honors in Finance and Information Management (FIM)

Oct 2024 – Today

- Current Grade: 1.1/5.0 – ranked 3rd in cohort of 30 students (acceptance rate < 5%).
- Focus on machine learning, reinforcement learning, and applied artificial intelligence.
- Completed interdisciplinary honors track including research phase, social impact project, and intensive training.

University of Bayreuth

Bayreuth, DE

Bachelor of Science in Industrial Engineering and Management (180 ECTS)

Oct 2021 – Sep 2024

- Final grade: 1.6/5.0 – ranked 1st in cohort and among the top 10% overall.
- Focus on statistics, optimization, and engineering systems with supplemental studies in innovation (30 ECTS, Grade: 1.2/5.0).
- Bachelor thesis: Virtualization of the Physical World: How Former Affordances Pave the Way for Future Technologies (Grade: 1.0)

Professional Experience

Wharton School (University of Pennsylvania)

Philadelphia, US

Visiting Researcher in Causal ML & Decision Support Systems

Feb 2026 – Today

- Conduct research on causal machine learning and human-AI collaboration in high-stakes decision environments.
- Co-authored a research paper accepted at ECIS 2026 (A-tier conference in Information Systems).
- Design and implement clinical decision support system using EHR data for patient-level outcome prediction and treatment recommendations.
- Apply causal inference methods to estimate individual treatment effects and enable counterfactual reasoning.
- Evaluate system performance using synthetic patient cohorts, feature ablation, and clinician-in-the-loop experiments.

inContAlert GmbH (Medical AI Startup)

Bayreuth/Munich, DE

Working Student | Business Development (CEO-Office)

May 2023 - Today

- Worked closely with CEO and CFO on investor evaluation, financial planning, and fundraising preparation.
- Led cross-functional projects securing >€620k in funding, supporting system development and validation.
- Conducted budgeting, forecasting, and financial reporting for fundraising and operational planning.

PricewaterhouseCoopers GmbH

Nuremberg, DE

Intern | Assurance Industrial Services

Mar 2023 – Apr 2023

- Worked with structured datasets to assess data consistency, integrity, and compliance under regulatory standards.
- Gained experience in systematic validation of complex data and reporting processes.

Scherdel GmbH

Marktredwitz, DE

Intern | Engineering and Manufacturing

Jul 2021 – Oct 2021

- Developed and optimized technical products by overseeing the full lifecycle from design to assembly.
- Managed operations of manual and automated production machinery, enhancing process reliability and output quality.

Extracurricular Activities

Manage and More Scholarship by UnternehmerTUM

Munich, DE

Scholarship Holder

Sep 2025 - Today

- Selected for a highly competitive program for 20 students focused on innovation, entrepreneurship, and technology-driven ventures.
- Analyzed structural and strategic challenges of deep-tech spin-offs in Europe and proposed an AI-based solution to enhance collaboration.

Because we care

Munich, DE

Social Engagement

Feb 2025 – Today

- Delivering financial literacy workshops in schools with 8 fellow students and Prof. Dr. Zagst, to empower pupils with crucial financial skills.
- Led efforts that secured a TUM ChangeMaker Award (€1,000), enabling additional workshops for 100+ pupils.

High-Tech Gründerfonds (HTGF)

Munich, DE

Deep Tech Venture Scout

Feb 2025 – Today

- Exclusive community of Germany's most active deep tech fund that supports early-stage founders and fosters science-based innovation.

Digital Leadership Academy at Fraunhofer Institute for Applied Information Technology (Fraunhofer FIT)

Bayreuth / Augsburg, DE

Scholarship Holder

Sep 2024 – Mar 2025

- Selected for a competitive program focused on digital systems, AI, and innovation in technology-driven environments.

Publications

European Conference on Information System (ECIS)

Milan, IT

Conference Paper

Jun 2026

- Title: “Integrating Causal Machine Learning into Clinical Decision Support Systems: Insights from Literature and Practice”
- Examined the integration of causal machine learning methods in clinical decision support systems based on a synthesis of literature and practical implementations, highlighting implications for healthcare AI adoption.

North East AI Agents Day at Jane Street

New York City, US

Abstract Presentation

May 2026

- Title: “What Does It Take to Detect an AI Agent? Minimal Feature Sets for Behavioral Detection under Browser Automation”
- Designed and evaluated machine learning-based approaches for detecting AI agents in browser environments, focusing on identifying minimal behavioral feature sets that enable robust agent classification and security detection.

Skills & Personal

Languages: German (Native), English (C1 – Advanced), Italian (A1 – Beginner).

IT: Data Analysis (Excel, Python), Product & Tech (CAD, Prototyping), Business (PowerPoint, Word).

Interests: Healthcare AI, Causal Machine Learning, Clinical Decision Support Systems, Data-Driven Decision Making, Extreme Sports.
